

**Suzanne E. Lapi** received her Ph.D. in Chemistry from Simon Fraser University for her work conducted at TRIUMF and went on as a post-doctoral scholar at University of California in San Francisco (UCSF) developing agents for Positron Emission Tomography (PET). She was a faculty member at Washington University in Saint Louis from 2008 to 2015 as an Assistant Professor and then as Associate Professor. In 2015 she moved to become Cyclotron Facility Director and Associate Professor of Radiology at the University of Alabama at Birmingham where she oversees production of PET radionuclides and radiopharmaceuticals for preclinical and clinical trials. Her research interests are in the development and translation of new PET imaging agents for oncology and she holds both federal and non-federal grants in this area. She is very interested in moving imaging agents forward to clinical use and she is currently producing isotopes and radiopharmaceuticals for several clinical trials. Dr. Lapi is President of the Radiopharmaceutical Sciences Council of the Society of Nuclear Medicine and Molecular Imaging (SNMMI) and has been a Board member of the Nuclear Division of the American Chemical Society (ACS) for the past 4 years. She also continues to be a strong advocate of radiopharmaceutical sciences and the training of future radiochemists.
