

Paul F. Mantica is a University Distinguish Professor at Michigan State University. He received his BS in Chemistry from Rensselaer Polytechnic Institute in 1985, and a Ph.D. in Nuclear Chemistry from the University of Maryland College Park in 1990. His research interests include the laser probing of rare isotopes to deduce nuclear moments, spins, and charge radii. At Michigan State, he holds appointments in the Chemistry Department and National Superconducting Cyclotron Laboratory, where he served as Associate Director for Operations from 2009 – 2012. Presently, he is Director of the Kuali Coeus Research Administration Project at Michigan State, and Chair of the NUCL division of the American Chemical Society. He is a Fellow of the both the American Chemical Society and the American Physical Society. He is also certified as a Project Management Professional by the Project Management Institute.
