

# NSF Nuclear Physics Overview for NSAC

## Allena K Opper

- ▶ Long Range Plan
- ▶ Highlights
- ▶ Budget
- ▶ Announcements
  - Solicitations
  - Other funding opportunities
- ▶ Physics Division Personnel

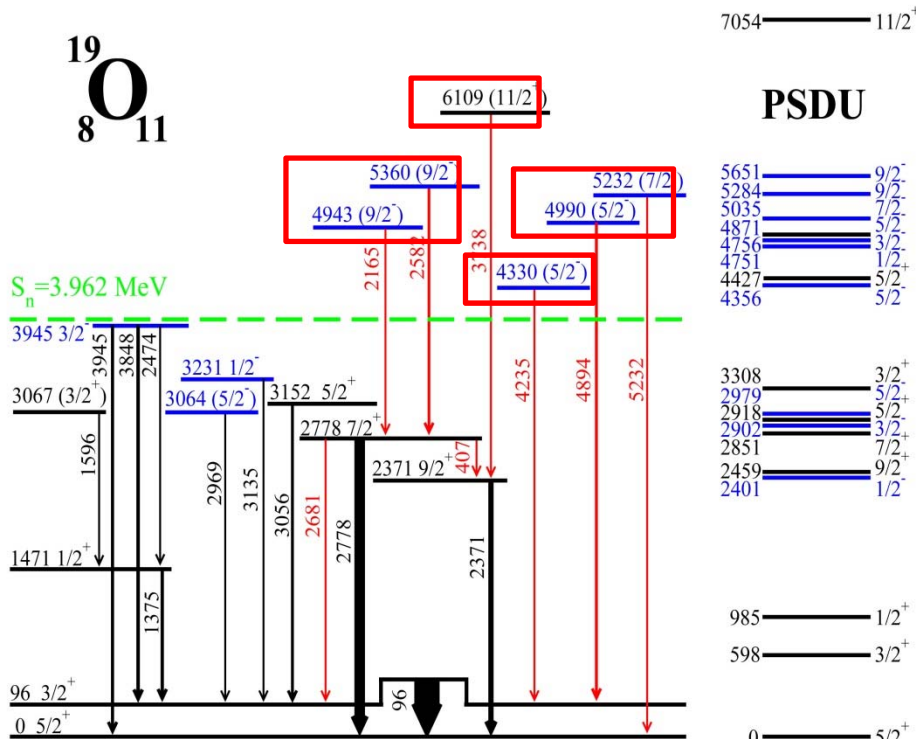

# NSAC LRP

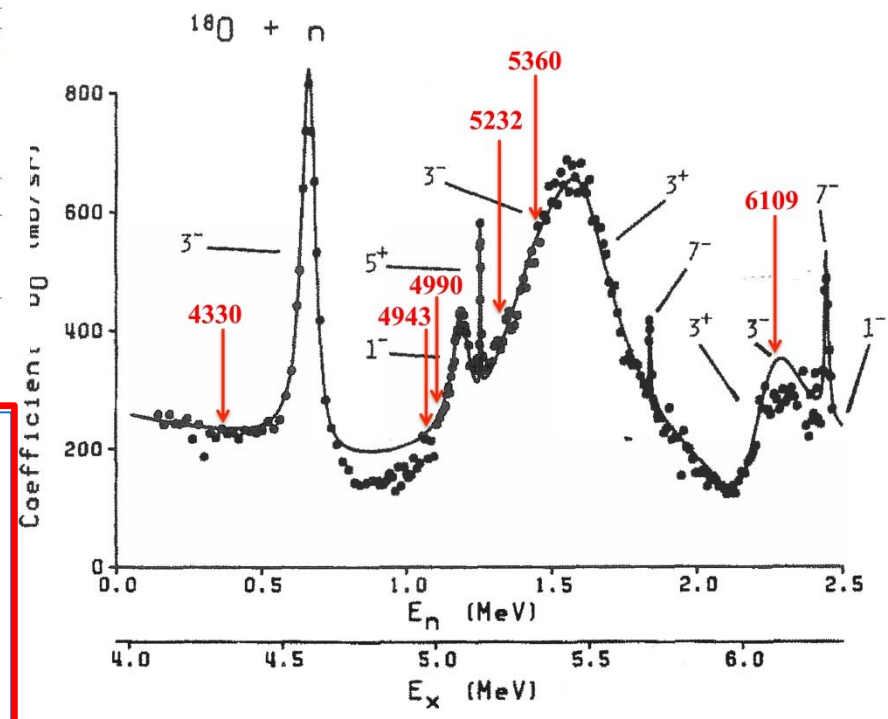

- ▶ Provides critical advice for review process
  - Crucial questions
  - Landscape
  
- ▶ Excellent cooperation between DNP and NSAC
  
- ▶ Thoughtful and serious work
  
  
- ▶ *Thank you*
  - DNP as well as to the Town Meeting organizers and conveners
  - The NP community for the input to the LRP-WG

# Highlights – new $\gamma$ states in $^{19}\text{O}$

These states (shown with red boxes to the left and red arrows in  $n$  resonance curve below) are interspersed among broader  $n$  decaying states. The  $\gamma$ -decaying states have somewhat higher spins and more complex intruder configurations leading to very small overlap with  $^{18}\text{O} + n$ .

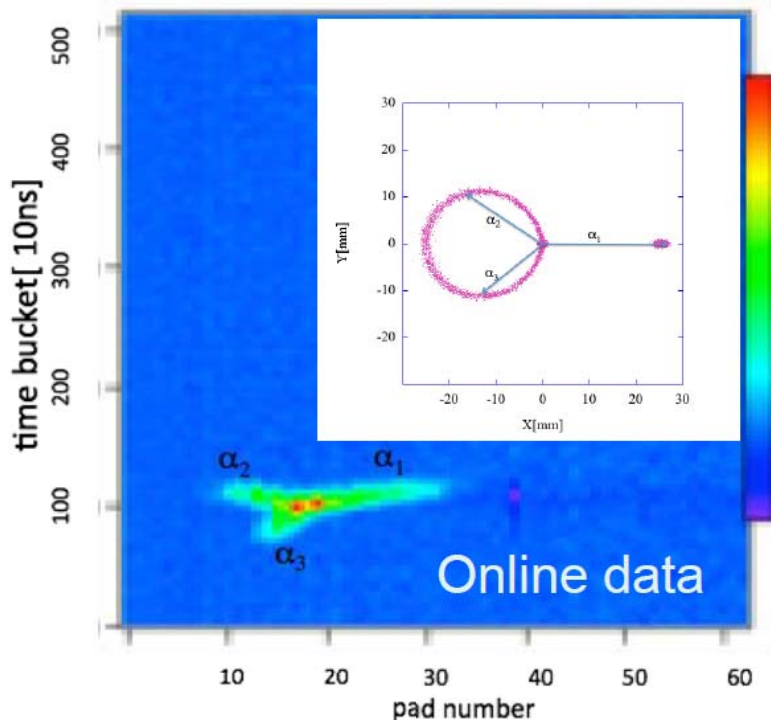

**FSU grad student Rutger Dungan discovered 6  $\gamma$ -decaying states unbound to neutron decay in  $^{19}\text{O}$  from the  $^9\text{Be}(^{14}\text{C}, \alpha n)$  reaction**

# Highlights – $^{12}\text{C}$ Hoyle State Investigations

He-burning  
red giant stars  $\longrightarrow$  C

Requires Hoyle state in  $^{12}\text{C}$   
but its nature not understood.

The TwinSol separator at the Notre Dame NSL

TwinSol separator  $\rightarrow$   $^{12}\text{B}$  beam

$^{12}\text{B} \rightarrow$  implanted in prototype AT-TPC  
 $\rightarrow$   $^{12}\text{C} + e^- + \bar{\nu}_e$

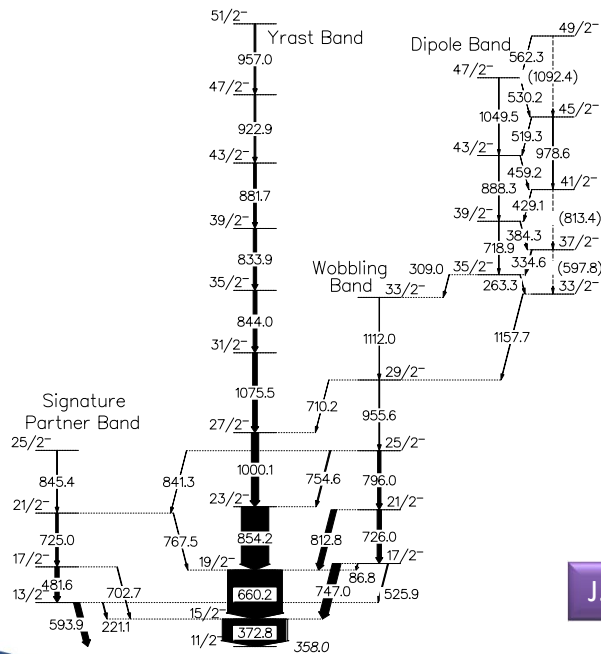

$^{12}\text{C} \rightarrow$  Triple-alpha decays, zero spin  
Hoyle State  
 $\rightarrow$  further investigations

# Highlights – Transverse Wobbling: New Collective Motion

Deformed nuclei – usually axial

Chirality (fairly common) or Wobbling (rare) → TRIAXIAL

Transverse Wobbling observed in  $^{135}\text{Pr}$

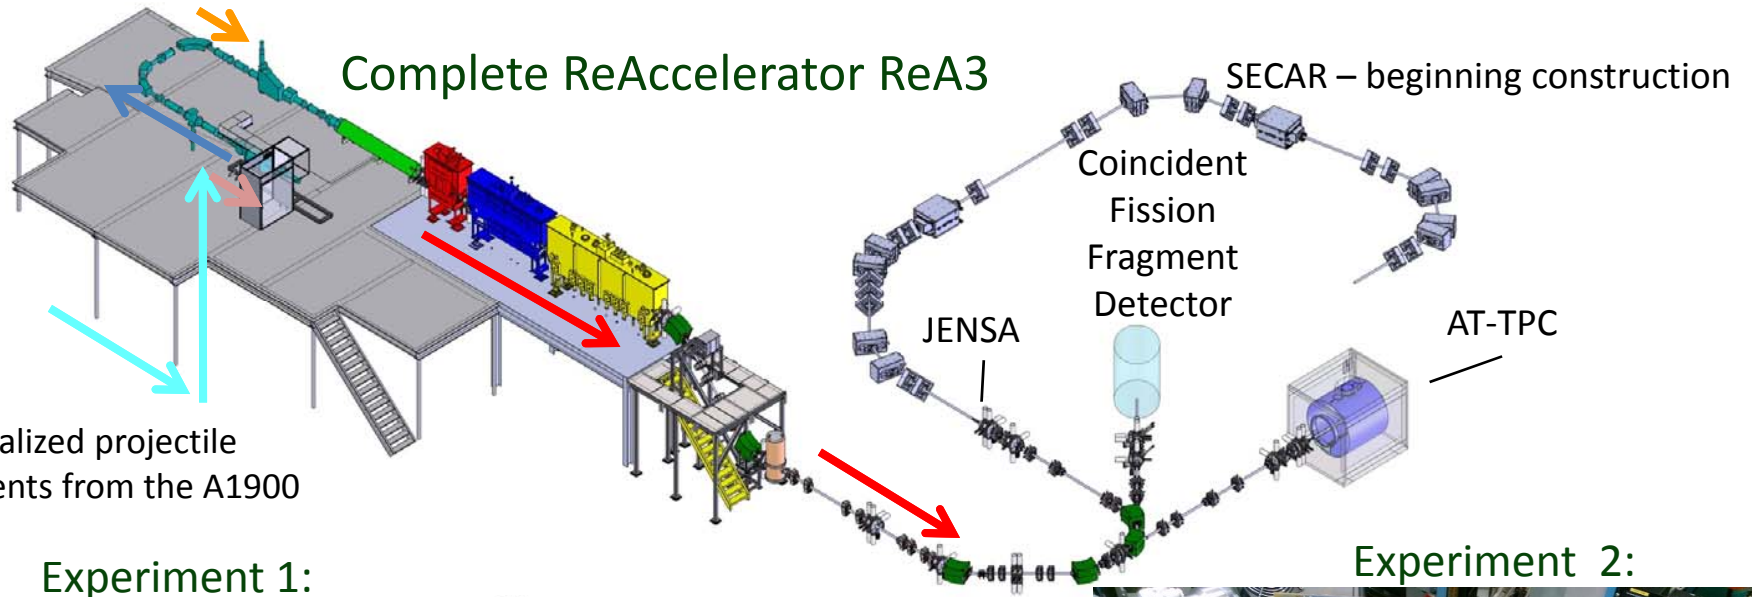

J.T. Matta et al., Phys. Rev. Lett. 114, 082501 (2015)

# Highlights –

# NSCL ReAccelerator Facility Operational

$^{46}\text{Ar} + p$  scattering in AT-TPC; Bazin, Mittig, et al.

$^{46}\text{K} + ^{181}\text{Ta}$  fusion-fission; Loveland et al.

# Highlights – High Precision Penning Trap Mass Measurements with LEBIT

## Program Goal

- Measurements for nuclear structure, nuclear astrophysics, fundamental interactions and symmetry tests

## Q-value Measurement of Superaligned $\beta$ -decay of $^{14}\text{O}$ via Penning Trap

- Contributes to tests of Conserved Vector Current (CVC) hypothesis
- One of 14 best-known decays, and the only one that had not been previously measured in a Penning trap
- Attempted multiple times at other facilities – now successfully measured at LEBIT in 2015

Precision:

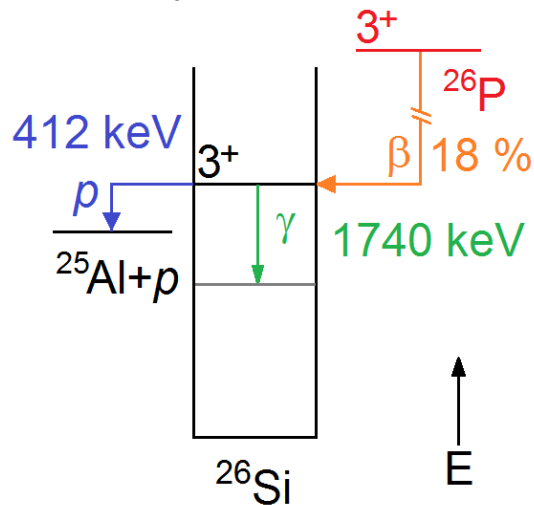

$$\delta m = 25 \text{ eV}$$

$$\delta m/m = 2 \cdot 10^{-9}$$

# Highlights – Production of $^{26}\text{Al}$ in Novae

$^{25}\text{Al}(p,\gamma)^{26}\text{Si}$  – dominant uncertainty  
in  $^{26}\text{Al}$  production in Milky Way

- Measured  $\gamma$  branch for first time to determine strength of  $3^+$  resonance
- Allowed the production rate of  $^{26}\text{Al}$  in novae to be accurately determined for the first time
- **Up to 30% of Galactic  $^{26}\text{Al}$  produced in novae**

$^{26}\text{P}$  decay ID

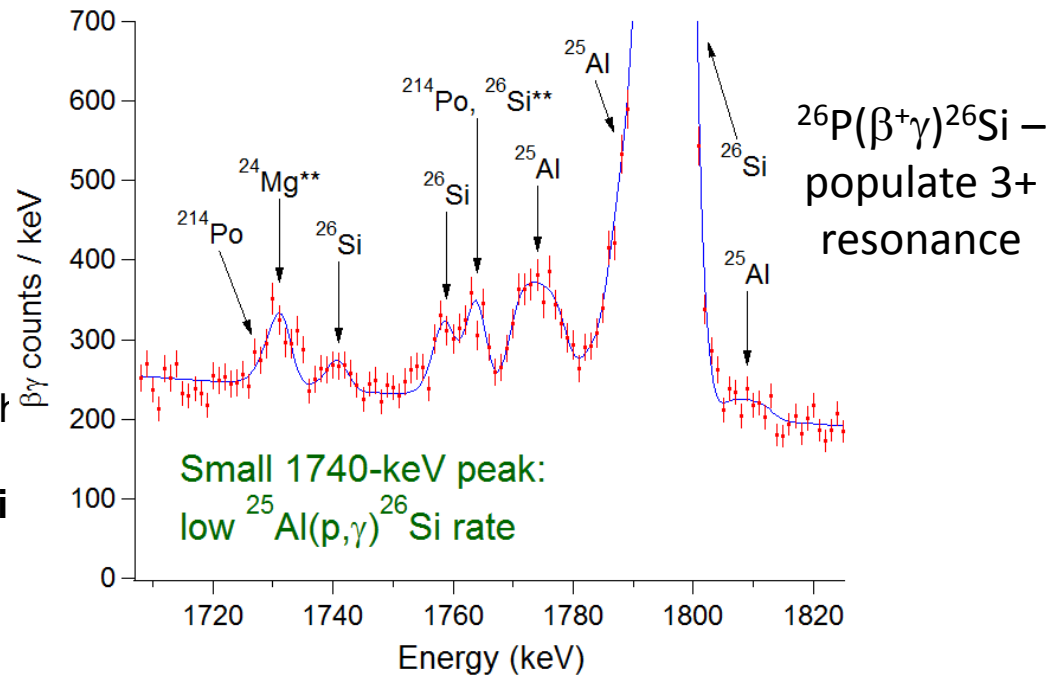

GEDSSD

Gamma detection

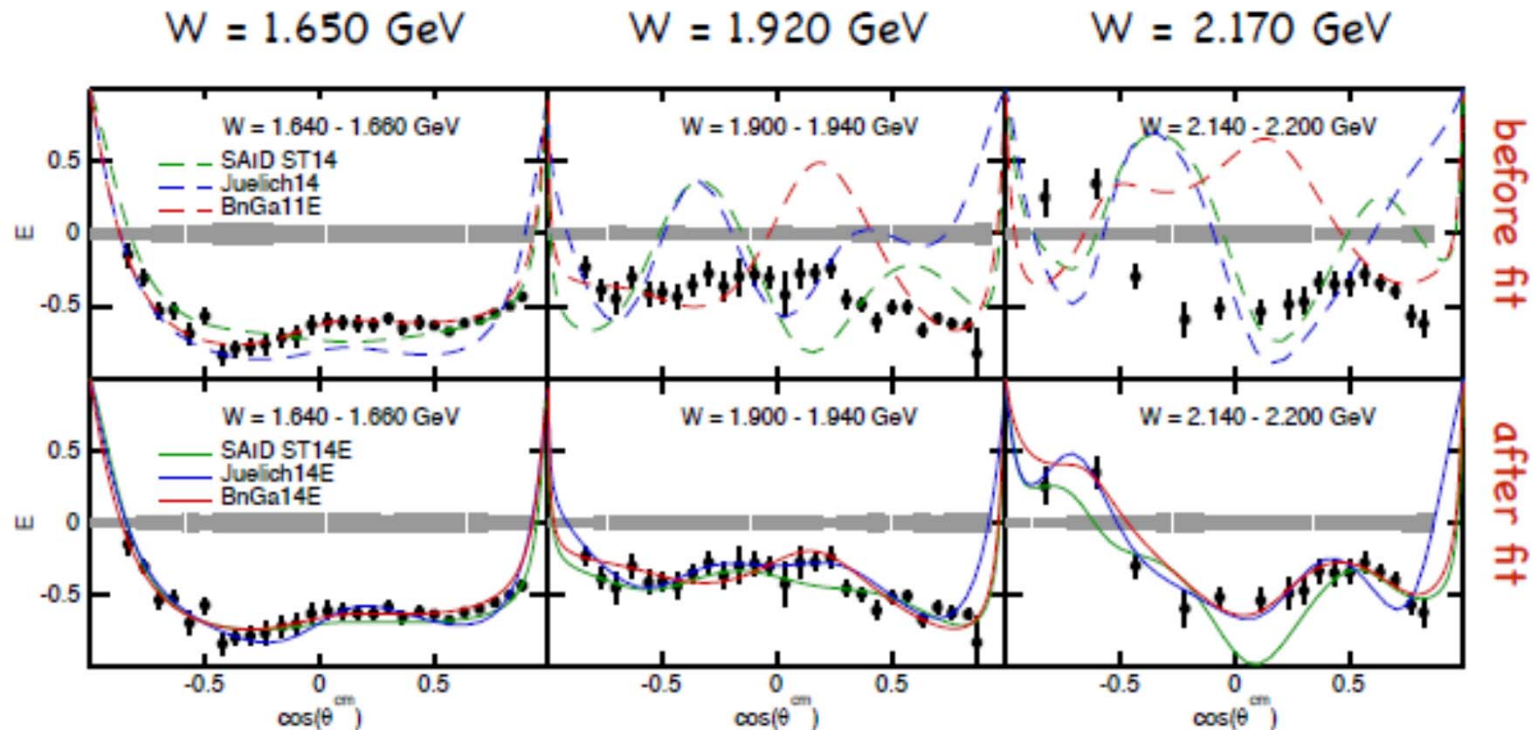

SeGA

# Highlights – Selected Results from FROST Experiment @ JLab $\gamma p \rightarrow \pi^+ n$

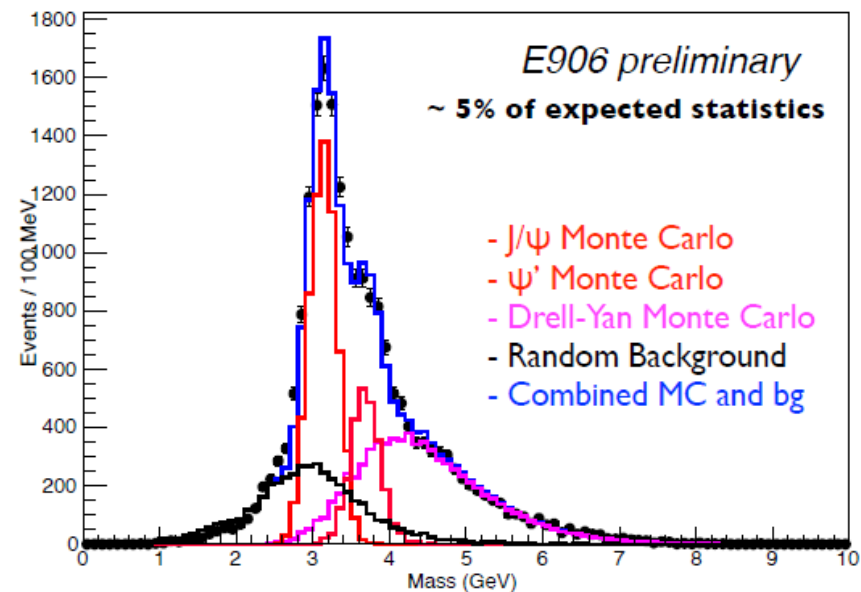

- FROST  $\rightarrow$  900 data points of **double-polarization observable E** in  $\pi^+$  photoproduction (circularly polarized beam on longitudinally polarized protons) for  $W = 1240 - 2260 \text{ MeV}$ .
- Significant improvements of the description of the data in SAID, Jülich, and BnGa partial-wave analyses after fitting.
- New evidence found in this data for a  $\Delta(2200)7/2^-$  resonance (BnGa analysis).

# Highlights – E906/SeaQuest

- Invariant mass distribution of  $\mu^+\mu^-$  pairs coming from the target shows mass resolution of  $\sim 180 \text{ MeV}/c^2$  — better than expected!
- Data agree well with simulation
- Physics results on  $d\text{-bar}/u\text{-bar}$  ratio in the proton coming soon!

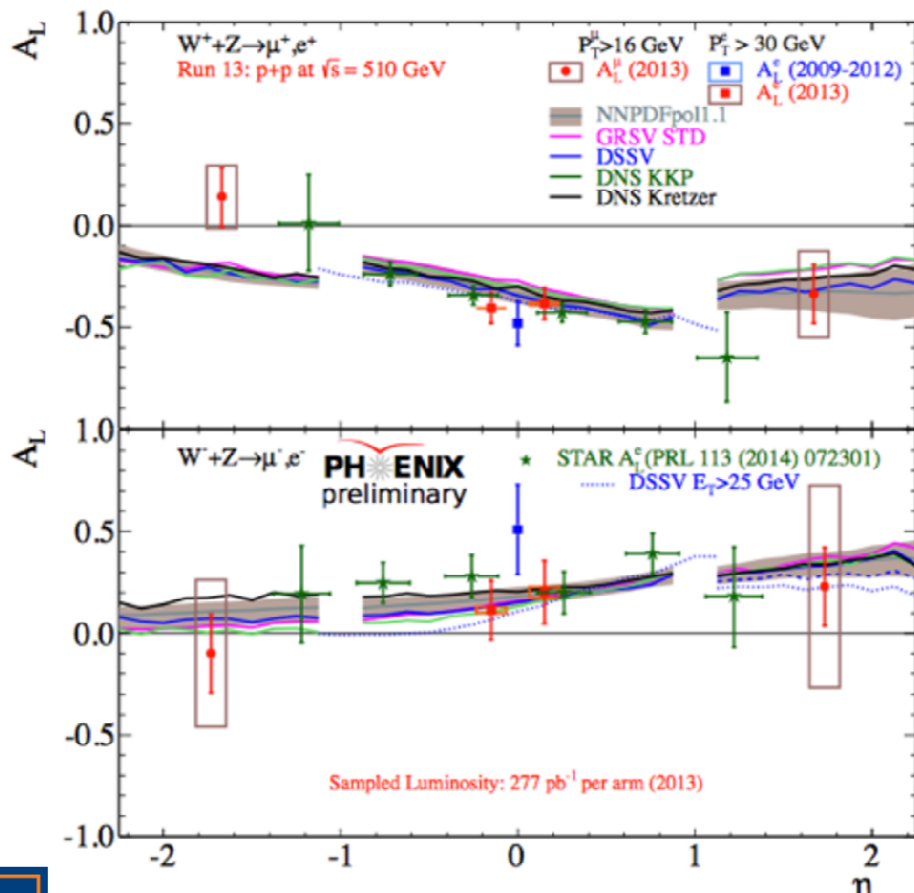

Liquid hydrogen and deuterium targets built and maintained by University of Michigan

# Highlights – Parity Violating $A_L$ in W-Production Observed in pol p-p @ RHIC Constrains $\Delta q(x)$ and $\Delta \bar{q}(x)$

PHENIX and STAR  $A_L$  for W-bosons

DSSV: projected impact of STAR and PHENIX  $A_L$ -W data

DSSV from "The RHIC Spin Program" Aschenauer et al. arXic:1501.01220

# Highlights – New Muon g-2 @ FNAL

Superconducting coils transported from Brookhaven arriving at Fermilab  
5200 Amps

The storage-ring magnet installed in MC1

First azimuthal field map at 1.45 T September 2015

Michigan setup for  $^3\text{He}$  magnetometry development

# Highlights – Final MiniBooNE

## $\nu$ Interaction Results

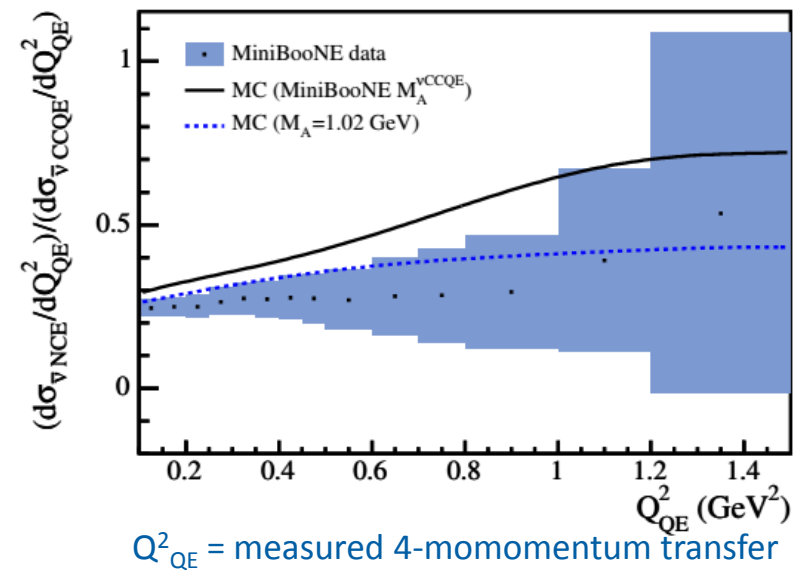

Charged and neutral-current quasielastic interactions on C  
(Phys. Rev. D **91**,012004, 2015, arXiv:1309.7257) →

- Multinucleon effects important for  $\nu$  interactions in nuclei at GeV energies
- Data constrain interaction models for many neutrino oscillation experiments (NoVA, microBooNE, and DUNE)

$\bar{\nu}/\nu$  NC quasielastic cross section ratio

$\bar{\nu}$  NC/CC quasielastic cross section ratio

# NSF MPS Funding Trends

MPS Subactivity Funding  
(Dollars in Millions)

FY 2009 funding reflects both the FY 2009 omnibus appropriation and funding provided through the American Recovery and Reinvestment Act of 2009 (P.L. 111-5).

# Budget Trends – NSF Nuclear Physics

FY	Hadrons & Light Nuclei (k\$)	Structure & Heavy Ions (k\$)	Fund. Sym. (k\$)	Nucl. Astro. (k\$)	Theory (k\$)	Program Total (k\$)	NSCL (k\$)	JINA JINA-CEE (k\$)	MRI (k\$)	Mid-Scale (k\$)	Total Nuclear Physics (k\$)

MRI: competes each year; supplemental one-time acquisition/development funds

Mid-scale: ad hoc competition; supplemental construction funds

# FY15 PHY Allocation was \$275 M

- Approximately 2% for Operations
  - Panels, IPA Appointments and Travel, M&S
- Approximately 30% for M&O for Facilities
  - ATLAS and CMS, IceCube, LIGO, NSCL
- Approximately 8% for Physics Frontiers Centers
  - Currently Ten (one of which is JINA-CEE)
- Approximately 4% for Education and Broadening Participation
  - REU Sites, LIGO Education Center, QuarkNet, ...
- Remaining 56% (\$154 M) for Six Major Areas of Physics (AMO, PP, GP, NP, PA, PoLS)
  - Experimental and Theoretical

# Solicitation for NSF Physics Division Investigator-Initiated Research Projects 15-579

All proposals submitted to the Division of Physics programs must go through this solicitation.

- **Deadlines:**
  - October 28, 2015 for Particle Astrophysics
  - **November 13, 2015 for Experimental Nuclear Physics & Theoretical Nuclear Physics**
  - December 3, 2015 Computational Physics
  - February 3, 2016 for Accelerator Science
- Follow Grant Proposal Guide (GPG)  
[http://www.nsf.gov/pubs/policydocs/pappguide/nsf15001/gpg\\_index.jsp](http://www.nsf.gov/pubs/policydocs/pappguide/nsf15001/gpg_index.jsp)
- Follow the GPG checklist
- Follow instructions that are specific to this solicitation ...

# Focused Research Hubs in Theoretical Physics (FRHTP) 16-501

**New!**

One of the two focused research hub will support theoretical work in the area of **Fundamental Symmetries, Neutrinos, and their applications to Nuclear Astrophysics** relevant to research within the purview of the Division of Physics

Number of awards: 1

Duration: 5 years

Anticipated funding: \$250k-\$500k/year, pending availability of funds

*The scientific goals of the hub should be achieved in the first five years of the project.*

Provide support for:

- \* Postdoctoral Researchers
- \* Hub related activities

Does NOT provide *additional* support for:

- \* Senior Personnel
- \* Graduate or Undergraduate Students

**Deadline:** January 22, 2016

Follow Grant Proposal Guide (GPG)

[http://www.nsf.gov/pubs/policydocs/pappguide/nsf15001/gpg\\_index.jsp](http://www.nsf.gov/pubs/policydocs/pappguide/nsf15001/gpg_index.jsp)

Follow instructions that are specific to this solicitation ...

**Contact Bogdan Mihaila for more information**

# Major Research Instrumentation (MRI) NSF 15-504

## FY15

- *Physics received 24 proposals, NP received 8 proposals, 3 funded*
- *Development of a Helium-Jet Ion-Guide System for Harvesting Rare Isotopes and Commensal Operation at NSCL, MSU, PI = R Zegers, \$1,200k*
- *Development of a Neutral Particle Spectrometer to Investigate Quark Structure of the Proton at JLab 12 GeV, Consortium, PI = T Horn, \$526k*
- *Gamma Spectroscopy System for Research and Research Training in Nuclear Physics, Wittenberg Univ, PI = P Voytas, \$75k*

## FY16

- Due date = 13-jan-2016
- Your university probably has an earlier internal deadline

# Career Awards

- Solicitation: 15-555
- Must include excellent research proposal as well as excellent educational plan
- There are eligibility requirements: e.g., must be assistant professor, untenured
- 5 year awards, \$400,000 minimum
- Proposal deadline: **July 23, 2015**
- PECASE nominees are chosen from CAREER winners
- Contact program officer for information/advice ahead of time (budget, scope)

# NSF/MPS/Physics Personnel

- **France Cordova** – Director
- **Fleming Crim** – Associate Director for MPS
- **Denise Caldwell** – Physics Division Director
- **Brad Keister** – Deputy Division Director
- **Bogdan Mihaila** – Nuclear Theory Program Director
- ★ **Ken Hicks** – Expt'l Nuclear Physics Program Director
- **Allena Opper** – Expt'l Nuclear Physics Program Director

Ken plans to return to Ohio University August 2016  
Search underway for a “rotator” Program Director in  
Experimental Nuclear Physics

The screenshot shows the NSF website interface. At the top, there is a navigation bar with links: HOME, FUNDING, AWARDS, DISCOVERIES, NEWS, PUBLICATIONS, STATISTICS, ABOUT NSF, and FASTLANE. Below this is the NSF logo and the text "National Science Foundation Directorate for Mathematical & Physical Sciences (MPS)". A search bar and a "QUICK LINKS" button are also visible. The main navigation bar for the MPS section includes: MPS HOME, MPS FUNDING, MPS AWARDS, MPS DISCOVERIES, MPS NEWS, and ABOUT MPS. The page title is "Physics (PHY)". On the left side, there is a sidebar menu with links: PHY Home, About PHY, Funding Opportunities, Awards, News, Events, Discoveries, Publications, Career Opportunities, Facilities and Centers, PHY Program Director Jobs, See Additional PHY Resources, and View PHY Staff. Below the menu is a search box for PHY Staff. The main content area features three sections: 1. "PHY Replaces DCL with Solicitation NSF 14-576" with a sub-header and a paragraph of text. 2. "PHY Int'l Activities - Potential Co-Review" with a sub-header and a paragraph of text. 3. "Special Announcements" with a sub-header and two links: "MPS Alliances for Graduate Education and the Professoriate - Graduate Research Supplements (AGEP-GRS) Dear Colleague Letter (NSF 13-071)" and "Dear Colleague Letter - Announcement of Instrumentation Fund to Provide Mid-Scale Instrumentation for FY2014 Awards in Physics Division (NSF 13-118)".
