

# General Plant Project: Laydown Yard Expansion Project

**Mission Need:** The storage area on the Northwest corner of the accelerator site will need to be moved to accommodate the new Test Lab High Bay Annex (TLHBA). A concept design was completed in 2020 to expand the existing Central Material Storage Area (CMSA). This project will establish an alternate laydown storage site near the Canon Blvd entrance to the CEBAF.

**Scope:** Expand on the existing laydown storage site near the Canon Blvd accelerator entrance to accommodate laydown storage requirements that will be displaced by the siting of the new Test Lab High Bay Annex (TLHBA) located on the Northwest corner of the CEBAF. Project includes a fenced and lighted gravel laydown area approximately 100 ksf with vehicle access.

**Drivers:** The TJNAF need for increased laydown space given current and future TJNAF project portfolio.

**TPC/Planned Completion:** \$2.25M/ 2<sup>nd</sup> QFY25
