Andrew J. Hilmer

Graduate Institution: Massachusetts Institute of Technology

Graduate Discipline: Chemical Engineering

Hometown: Oshkosh, WI

Relevant SC Research: Basic Energy Sciences

Research Interest:

Nanotechnology; optoelectronic materials; interfacial phenomena; alternative energies

About Me:

I obtained my undergraduate education at the University of Rochester, where I graduated with a B.S. in chemical engineering. I then matriculated into the Massachusetts Institute of Technology, where I am currently a PhD candidate in the Strano research group. Our lab focuses on the utilization of single-walled carbon nanotubes (SWNTs) for a variety of sensor and energy applications.
